

PSYCHDATA – SHARING RESEARCH DATA IN PSYCHOLOGY

Researchers need to consider the long-term preservation of their digital data in independent sustainable infrastructures.

PsychData is a research infrastructure that makes data management and long term data preservation in Psychology possible.

PsychData is an accredited data center at the German Data Forum.

PsychData benefits:

- increases the impact and visibility of research
- provides resources for education and training
- enables analyses beyond the scope of the original research
- avoids the duplication of existing data collections
